Renaissance Capital Africa

Renaissance Securities (Nigeria) Limited

JOB PROFILE

POSITION: Analyst/Associate	*DEPARTMENT AND LOCATION: IT RS(N)L, Nigeria*

JOB PURPOSE:

To design, build and maintain secure, high-performance iOS and Android applications for equity trading, fund subscription/redemption and portfolio management, fully integrated with the company's back-office (Symplus), trading engine and payment systems through APIs.

POSITION REPORTS TO: Head of Technology	*DIRECT REPORTS:*

MAJOR RESPONSIBILITIES:

- Develop and maintain cross-platform mobile apps (Flutter or React Native) and native modules (Swift/Kotlin) where needed.
- Integrate mobile apps with back-office (Symplus) systems — client accounts, portfolio valuation, settlements, CSCS/custodian records — via RESTful, GraphQL and WebSocket APIs.
- Build real-time market data features: live price tickers, watchlists, order books and interactive charts.
- Implement order placement, modification and cancellation flows with the OMS/trading engine.
- Integrate KYC/onboarding (BVN/NIN verification, ID capture, liveness check) and payment gateways for wallet funding and withdrawals.
- Implement mutual fund subscription, redemption and statement generation features.
- Enforce mobile security: biometric login, 2FA/OTP, certificate pinning, encrypted storage, jailbreak/root detection.
- Write unit, widget and integration tests; maintain CI/CD pipelines and manage App Store / Play Store releases.
- Work with back-end, compliance, operations and UI/UX teams to deliver features that meet regulatory requirements.
- Build the web investor portal: client login, account opening, portfolio view, trade history, fund subscription/redemption and statement downloads.
- Integrate the website and portal with the back-office (Symplus) through RESTful APIs for client data, valuations and statements.
- Display live and delayed market data: stock prices, indices, daily price lists, NAV and fund performance charts.
- Monitor app performance and crashes, and resolve production issues promptly.
- Manage hosting, domains, DNS, backups and uptime monitoring; resolve outages with minimal downtime.

TECHNICAL KNOWLEDGE / QUALIFICATIONS REQUIRED:

ESSENTIAL

- Bachelor's degree in Computer Science, Information Technology, or a related field (Master's degree preferred).
- B.Sc. in Computer Science, Software Engineering or a related field.
- M.Sc. is an added advantage.
- Minimum 5 years of mobile development experience, with at least 2 published apps on App Store and Google Play.
- At least 3 years in fintech, banking, brokerage or investment.
- Proven experience integrating mobile apps with enterprise back-office systems via APIs.

  Certifications (e.g. Google Associate Android Developer, AWS, CompTIA Security+) are an added advantage

LIKELY / NECESSARY EXPERIENTIAL BACKGROUND:

ESSENTIAL

- This role requires a visionary leader with the ability to balance strategic thinking and hands-on management in a fast-moving financial environment.
- Strong command of Dart/Flutter or JavaScript/TypeScript (React Native); working knowledge of Swift and Kotlin.
- REST, GraphQL, WebSockets, JSON, OAuth 2.0 / OpenID Connect, JWT.
- State management (Bloc, Riverpod, Redux or MobX) and clean architecture.
- Capital market concepts: order types, settlement cycles (T+2/T+1), NAV, portfolio valuation.
- Familiarity with NDPA 2023 / GDPR and SEC digital sub-broker guidelines.
- Experience with Symplus (back-office application) is a plus.
- Excellent problem-solving, communication and documentation skills.
- Demonstrates clear and proactive communication.
- Exhibits adaptability and receptiveness to feedback.
- Displays strong attention to detail and accountability

COMPETENCIES

- Customer focus
- Communication
- Ability to act as a team member or independently
- Ability to understand and follow corporate standards and procedures.
- Demonstrates multi-tasking ability
- Demonstrates ability to wok under pressure and tight deadlines.
